

MEDICAL REPORT

COMPLETED WITHIN 45 DAYS OF COMMENCEMENT OF STUDY

GENERAL

The Communicable Disease Protocols require that hospitals and community placements must have documented proof of immunization and/or history of specific communicable disease for all persons. Please provide actual dates for requested immunizations listed below.

Dear Health Care Provider:

College students who have placement in a health care setting must complete the attached Medical Report in order to be considered for placement.

Important Things to Note:

A 2-step TB skin test is required. Please ensure all fields are documented on the form, please express interpretation in mm of induration. Even if there is no reaction, there must be 0mm documented. Simply writing 'negative' will not suffice.

Do not vaccinate your patient with MMR, Varicella or COVID 19 vaccines until after TB skin testing is complete.

If patients have had one previous positive TB skin please include documentation of this previous positive test, including mm of induration.

History of BCG vaccine is not a contraindication to TB skin testing.

Please do not receive any Covid-19 vaccine until your TB skin testing is complete. If you have recently received a Covid-19 vaccine, please wait 28 days from the date of administration to start the TB skin testing process. This 28-day waiting period is required as a Covid-19 vaccine can alter the results of the TB skin test.

MMRV vaccination is not approved for use in Canada for patients over the age of 12 per NACI guidelines. https://www.canada.ca/en/public-health/services/immunization/national-advisory-committee-on-immunization-naci.html

If your patient requires Varicella vaccination the minimum interval between doses is 4 weeks and NACI recommends 6-12 weeks between doses.

All adults working in Health Care settings regardless of age, should receive a single dose of tetanus diphtheria acellular pertussis vaccine (Tdap) for pertussis protection if not previously received in adulthood. The adult dose is in addition to the routine adolescent booster dose.

Please ensure you provide your patient with all patient vaccination records and bloodwork results. Vaccination records and bloodwork results must be translated and provided in English.

Thank you so much for your assistance,

National Association of Career Colleges
